CAREER OBJECTIVE

Technical Writer with experience in product, user, API, and integration documentation for fintech, payment orchestration, and enterprise software platforms. Skilled in documenting complex business logic, REST APIs, UI workflows, and system behaviour. Experienced with Material for MkDocs, Markdown, HTML/CSS, Git, Jira, and cross-functional collaboration.

SKILLS

Hard Skills and Knowledge

Technical, product, user, and API documentation
Payment orchestration and fintech documentation
REST APIs, Swagger/OpenAPI, JSON, webhooks, and callbacks
BRD, SRS, technical specifications, and release notes
Material for MkDocs, Markdown, HTML/CSS
Jira, Confluence, Notion, Google Docs, GitBook
Git, GitHub, Bitbucket
Diagrams and user flows: Miro, Draw.io
Requirements analysis and documentation validation

Soft Skills

Analytical and logical thinking
Strong written and oral communication
Attention to detail
Time management and multitasking
Cross-functional collaboration

Languages

Fluent in English (B2 spoken, C1-C2 written) Ukrainian and Russian (native)

WORK EXPERIENCE

TECHNICAL WRITER (Part-time) – Sensus – February 2026 – Present time

Create and maintain technical, API, integration, and product documentation for payment-processing and payment-orchestration platforms.

Key responsibilities:

- Transform OpenAPI specifications, Jira requirements, source documents, screenshots, demos, and developer input into structured guidance for merchants, integrators, operations teams, and platform administrators.
- Document platform configuration, merchants, payment methods, providers, routing, balances, orders, transactions, access control, and operational monitoring.
- Produce endpoint references covering authentication and request signing, parameters, nested schemas, request and response examples, statuses, validation rules, errors, and webhooks.

- Build reusable documentation components for schemas, code samples, tables, admonitions, and responsive API layouts using Material for MkDocs, Markdown, HTML, CSS, Python, and Jinja templates.
- Create evidence-based conceptual models and developer-style diagrams for complex financial entities and workflows.
- Maintain documentation in Git and Bitbucket, support CI/CD publishing, and troubleshoot navigation, styling, assets, local environments, and hosted builds.

TECHNICAL WRITER – SPRIBE – October 2025 – Present time

Working on full-cycle product documentation for platform products.

Key responsibilities:

- Creating structured technical documentation for complex product modules (BackOffice, User Management, Admin Area, CRM, CMS, Risk Management, Payments etc).
- Writing detailed functional descriptions for UI elements, workflows, tables, validation rules, and configuration logic.
- Preparing release notes with clear functional impact and proper classification.
- Analyzing Jira tasks, videos, demos, and backend changes to convert them into structured documentation.
- Standardizing documentation style across modules (field descriptions, system behavior, edge cases).
- Collaborating with developers, QA, product managers to clarify logic before documentation.
- Maintaining documentation consistency across different documentation modules.

Focus areas: business logic clarity, operational workflows, configuration transparency, and structured documentation architecture.

TECHNICAL WRITER (Part-time) – Finamp – July 2025 – January 2026

- Created structured BRD and SRS documentation for a fintech mobile app, covering business logic, user flows, and system behavior.
- Documented financial architecture: Holders, Users, Devices, SVF accounts (wallets, bonuses, vouchers, gift certificates, digital stamps).
- Described rules for wallet operations including activations, expirations, holds/freezes, and partial redemptions.
- Prepared documentation for the Admin Panel (dynamic fields, CRUD operations, user/device/SVF management, configuration rules).
- Collaborated with PM and development teams, created diagrams and user-flow scenarios for onboarding, KYC, loyalty, and transactions.

TECHNICAL WRITER – Yellow Duck Coders – February 2025 – October 2025

- Create BRD, UI/UX descriptions, technical specifications, and brief API overviews for various software products.
- Perform light business analysis: gather and clarify requirements, refine functionality, and support product decision-making.
- Design diagrams, flowcharts, and system maps to visualise user flows and system behaviour for the team and stakeholders.
- Communicate directly with clients about design, functionality, and documentation to clarify details and validate solutions.
- Collaborate with developers and QA, consulting them on requirements and writing clear Jira task descriptions for backend and frontend teams.
- Document and support solutions across multiple domains, including social platforms, transportation, mobile apps, fintech products, and other custom software.

TECHNICAL SUPPORT SPECIALIST – GeeksForLess – May 2024 – February 2025

- Providing technical support services to customers and partners, related to domain names registration, DNS, webhosting, email services, databases, etc.
- Creating comprehensive instructions for end users, explaining complex terms in simple words, hands-on assistance with resolving technical issues
- Investigation of technical issues with internal tools, troubleshooting, testing software, and escalation.
- Interaction with ticketing systems, including Jira, processing tickets, escalations.

- Technical expertise included, but not limited to:
 - Domain names registration, WHOIS, domain registration, transfer, and renewal processes.
 - Webhosting: VMS management, FTP/File Management, .htaccess configuration, etc.
 - Email Services: POP3, IMAP, SMTP, SPF, DKIM, DMARC, and email client configuration (Outlook, Thunderbird), testing via telnet/openssl, analysis of logs and email headers
 - Other: Website security (SSL installation and troubleshooting), database management (MySQL, phpMyAdmin)

SAFETY DEPARTMENT SPECIALIST – Delta Express/Ontrack Transportation –February 2022 – April 2024

- Problem-solving and crisis management
- Compliance and claims management
- Interaction with CRM systems, working with documentation (claim presentations, claim denial letters, letters of exclusivity, cargo release letters, temperature/humidity reports)
- Liaising with contractors, brokers, customers, and insurance companies
- Loss mitigation and customer support
- Project management (developing a refrigerated goods transportation project, contributing to project planning, coordination, and implementation)

EDUCATION

- **MASTER'S DEGREE IN PHILOSOPHY (Graduated in 2025)**
Taras Shevchenko Kyiv National University
- **MASTER'S DEGREE IN APPLIED MECHANICS (Graduated in 2025)**
Sumy State University

ADDITIONAL TRAINING

- Technical Writing: How to Write Software Documentation, Udemy
- English Language Course, English Prime (1.5 years)
- Python Essentials, Cisco Networking Academy, <https://github.com/MaksimKulik/Python-projects/>
- HTML/CSS for documentation, Github-based portfolio: https://maksimkulik.github.io/Portfolio_rep/
https://github.com/MaksimKulik/Portfolio_rep
- SQL course, Codecademy
